PROFESSIONAL SUMMARY

Full Stack Developer (MERN) with **2+ years** of experience designing and shipping end-to-end web applications using **React.js, Next.js, Node.js, Express.js, and MongoDB**. Equally strong across frontend and backend — building responsive **React/Next.js** UIs and design systems alongside **REST APIs, JWT authentication, RBAC, WebSocket real-time features, and event-driven background workers** serving **200+ users across 5 hospitals**. Reduced page load time by **40%** and cut delivery time by **30%** using **AI-assisted development** (Claude Code, GitHub Copilot). Experienced in **Agile/Scrum** with **CI/CD** delivery practices.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js (App Router, SSR/SSG/ISR), TypeScript, JavaScript (ES6+), Redux Toolkit + RTK Query, Zustand, Chakra UI, Tailwind CSS, Storybook, Responsive UI, UI Design Systems
- **Backend:** Node.js, Express.js, RESTful API Design, JWT Authentication & Refresh Tokens, Role-Based Access Control (RBAC), WebSockets (Socket.io), BullMQ Queues, Cron Jobs, Background Workers, Rate Limiting
- **Database & Caching:** MongoDB (Schema Design, Aggregation Pipelines, Data Modeling, Scripting), Redis (Upstash), Caching & Invalidation
- **Architecture:** Layered Architecture (Route → Controller → Service → Repository), Event-Driven Design, BFF Pattern, Cursor-Based Pagination, AWS S3 (Presigned URLs)
- **Testing:** Jest, React Testing Library (RTL), Vitest, Playwright (E2E), MSW, Unit & Integration Testing
- **AI & Tools:** Claude Code (Anthropic), GitHub Copilot, Prompt Engineering, Postman, Swagger / OpenAPI, Pino Logging
- **Build & DevOps:** Vite, Webpack, Git, GitHub, GitHub Actions (CI/CD), Vercel, Railway, Agile/Scrum, Code Reviews

EXPERIENCE

Full Stack Developer, Unthinkable Solutions

India | Jan 2024 – Present

- Designed and built end-to-end features across a **React.js** frontend and **Node.js / Express.js** backend; delivered a platform now serving **200+ users across 5 hospitals** in **Agile/Scrum** sprints.
- Engineered **JWT-based authentication** and **Role-Based Access Control (RBAC)** for multi-role access (admins, doctors, staff) with secure session and permission management.
- Built **RESTful APIs** from design to deployment covering CRUD, business logic, and data validation; integrated **WebSockets** for real-time status updates across the platform.
- Wrote **MongoDB aggregation pipelines** and scripts to auto-generate Excel reports; contributed to data modeling and schema design across key collections.
- Optimized **React.js** frontend performance by **40%** using `useMemo`, `useCallback`, `React.memo`, lazy loading, and code-splitting; built and maintained a **UI Design System** with **Chakra UI** and **Storybook**, with **Jest/RTL** test coverage.
- Used **Claude Code** and **GitHub Copilot** for **AI-assisted development**, reducing delivery time by **30%** through faster scaffolding, debugging, and code review; contributed to **CI/CD** pipelines with **GitHub Actions**.

PROJECTS

Healthcare Management System — MERN Full Stack Platform

Company Project

- Built a MERN stack healthcare platform for **200+ users across 5 hospitals** with patient dashboards, appointment scheduling, and **JWT + RBAC** for admins, doctors, and staff.
- Architected backend APIs and **MongoDB schemas** end-to-end; achieved **40% faster page loads** via React optimizations and real-time updates via **WebSockets** and cron-based automation.

NotifyFlow — Task Management & Notification Platform

[Live](#)

- Architected a production-grade backend with **Node.js, TypeScript, Express, MongoDB, Redis (Upstash), Socket.io, and BullMQ** in a layered **Route → Controller → Service → Repository** pattern; implemented **JWT auth with refresh tokens**, **RBAC**, cursor-based pagination, **Redis caching**, rate limiting, **BullMQ** email queues, and **S3 presigned** uploads. Deployed backend on **Railway** and **React + RTK Query** frontend on **Vercel** via CI/CD.

NextCart — Next.js E-Commerce Storefront

[Live](#)

- Built a full-stack storefront with **Next.js 16 App Router** using typed **Route Handlers (BFF)**, all four **Next.js caching layers**, tag-based revalidation, **ISR/SSR/CSR** strategies per route, and **Zustand** cart state with hydration-safe persistence.

Netflix-GPT — AI-Powered Movie Search Application

Personal Project

- Built a full-stack app with **GPT-powered movie search**, user authentication, and personalized recommendations; integrated the **OpenAI API** on the backend with rate limiting and error handling, and used **Redux** for global state.

EDUCATION

Master of Computer Applications (MCA) — GLA University

Mathura | 2022 – 2024

Bachelor of Computer Applications (BCA) — Rajiv Academy

Mathura | 2019 – 2022
